Just so we're all 100% clear here: When you share a file, data is being transferred between your computer or phone and our servers, then from our servers to your friends device. Alternatively you can choose to share your download links on blogs, forums and social networking sites. When you use file, you avoid storing the file you're sending in your cloud storage or mail server. Simply upload your file and share the link. It is also allowed to link to the download page from websites and communities. If only we could, we surely would! On the other hand, using file can actually save you money. Unfortunately, we can't make that part free. Why pay storage fees for a file that you just wanted to send to a friend or colleague? You can upload any type of file (movies, music, documents, images, zip files and more). You can give this download link to your friends by mail or instant messenger. There are no restrictions on the number of times a file can be downloaded. Files can be downloaded from any computer from our high speed servers. Our service is completely free for everyone. You don't need any special software installed to be able to download your files. You decide who you want to share your files with. The cost of that data transfer is covered by your internet service or the data plan on your phone.
