The cost of that data transfer is covered by your internet service or the data plan on your phone. You don't need any special software installed to be able to download your files. When you use file, you avoid storing the file you're sending in your cloud storage or mail server. Alternatively you can choose to share your download links on blogs, forums and social networking sites. Using file, you can circumvent those limits without paying to upgrade your team chat service. Unfortunately, we can't make that part free. Simply upload your file and share the link. Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, many team chat apps have limits to the size of files that can be transferred within their apps. Our service is completely free for everyone. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees. No account or credit card is required to get started. Your wallet will be none-the-lighter! Just so we're all 100% clear here: When you share a file, data is being transferred between your computer or phone and our servers, then from our servers to your friend's device. There are no restrictions on the number of times a file can be downloaded. It is also allowed to link to the download page from websites and communities. Any file in any format can be uploaded and downloaded for free. filehosting provides an easy possibility for you to send large files to your friends.
